

spine staircases

great variety, open look

Our custom made spine and spiral staircases provide an open and airy feel and are manufactured from powder coated mild steel or marine grade stainless steel. They feature aluminium, stainless steel and /or glass balustrading and can be customised with beautiful treads in a variety of local or imported timbers with options for steel, stone or glass.

Here are our standard treads.

Every staircase is custom made for each home. Your staircase will be delivered and installed by our professional team.

Temporary treads, balustrade and spine protection will be provided during your construction period. Final balustrade and treads will be installed prior to handover.
